

Versa

SPECIFICATION SHEET

Not for everyone

THE PRODUCT

Simplicity is the key while dealing with natural materials such as wood. In Morfloor we give our best to design our products so that the natural beauty of the material shines through. Nature is our prime inspiration when it comes to creating different finishing hues for our flooring.

Versa is a sustainable and strong interior wood material, composed of veneers of end grain wood and wood with the grain, glued crosswise. This gives it a clear line structure and graphical effect. Thanks to the use of end grain wood, our product is generally stronger than regularly cut wood of the same tree.

TILING GEOMETRY

The Versa module consists boards of equal length and width.

The general form of the Versa module is as follows:

The layout of the Versa modules relative to each other is as follows:

TECHNICAL DATA

Versa board is 12 mm thick and has bevels on all four sides. The boards are connected using the dovetail connectors joint method.

Each module contains 6 boards covering an area of 1.2 m².

Box

length: 1202 mm
width: 172 mm
height: 180 mm
weight: 8.2 kg/m²

Board

length: 1200 mm
width: 170 mm
thickness: 12 mm
weight: 8 kg/m²

General Material Performance Data

			E1								
COMPATIBLE WITH UNDERFLOOR HEATING	EASY STAIN REMOVAL	SUITABLE FOR OFFICE CHAIRS	APPROVED FOR EMISSIONS	HIGH PRESSURE EXTREME DURABLE	SILENT SYSTEM	HIGH COMPRESSIVE STRENGTH	WITHSTANDS SPECIFIED CHEMICALS	EASY MAINTENANCE	DOES NOT FADE IN DIRECT SUNLIGHT	SCRATCH RESISTANT	PERFECT FINISH

Core layer : Birch plywood
Overall thickness : 12 mm

VERSA IS MADE IN

Birch
Natural

BEVELS

Versa is manufactured with 0.5 mm bevels on both the long and short edges for natural looks.

QUALITY GRADING

Colored
A fantastic fine and protective finishing

Due to Versa's characteristics, this product is only available in colored finishing.

CARE AND MAINTENANCE

Morfloor wooden flooring last for generations. The protective microporous finish allows the wood to breath, thus keeping it „healthy“. The finish repels moisture and dirt. And should any dirt or damage occur, it is easy to clean and repair. Floor care for oiled floors is easy if you follow some basic rules.

For more information, ask for *Installation, maintenance and cleaning guide.*

DUSTING

An oiled wooden floor repels dirt. Unlike many other types of flooring, it does not develop an electrostatic charge and does not offer breeding grounds for microbes and allergens. Dust, lint or animal hair can be removed with a vacuum cleaner or broom.

VACUMING

As painful as this one also sounds, weekly vacuuming is not only key to keeping your home clean, but also making sure any crumbs and dirt you missed while sweeping don't scratch your floor.

CARE AND MAINTENANCE

MOPPING

How often your wood flooring has to be mopped depends on the demands placed on it. For private households, once a week is normally enough, for restaurants and other high traffic areas, you should mop floors daily.

SCRATCHING

- Place felt pads or soft furniture protectors under all furniture. Narrow glides and casters can damage wooden floors, so switch to wide types if possible. PICK UP all furniture to move over flooring.
- Do not wear high heels, cleats, cowboy boots or work boots on wood floors as the concentrated heel pressure can leave indents. We suggest removing shoes when entering your house to minimize tracking in dirt on soles.
- Keep pet nails trimmed and minimize animal play on wood floors to prevent scratching and dulling of wood finish.
- Elevate potted plants from flooring as moisture can seep from ceramic pots and leave marks on wood floors.

COLORS

color code 401

color code 402

color code 403

Wood is a product of nature. Each tree has its own structure and individual color combination. The colors are indicative and variations in screen settings and printing may occur. Always check real life samples to be sure of the chosen color. Ask for current listing of the colors. The list is never complete; nature's diversity in colors and hues will not allow it. Ask us about individual color development to find the exact tone that suits you.
